

## Step 6: Identify the learning design features

### Example

**retailer**

Home Scenario Training Room Glossary Learning Map

#### Welcome

Welcome to Retailer, your Toolbox for the retail industry.

We all like to shop in different ways – browse, impulse buy, a quick fly in and fly out again. It's the same with learning, so this Toolbox gives you some different ways to get around.

You can use the shopping centre map to:

- roll over the shops to see what's happening
- select a shop
- start a scenario by selecting one of the people in the shop.

If you prefer, use the menu to go to the:

- Scenario home page to choose a scenario
- Training Room home page to choose a training session
- Glossary to check out common words used in the retail industry
- Learning Map to get more information about what you have learned and how it applies to your course.

This example, from the Series 10 *Retailer Toolbox*, shows the interface which describes the various supports and features the design contains.
